Kittapon Junsupakul (Pipe)

Senior Software Engineer II, Frontend · LINE MAN Wongnai · Bangkok, Thailand

Summary

Software engineer at LINE MAN Wongnai since 2020, focused on frontend, frontend architecture and developer tooling. I build the commerce flows people use inside the LINE MAN app (subscriptions, deals, group orders and payments) and the shared SDKs, design systems and build tools other teams build on. 2,414 merge requests across 98 repositories since 2020.

Experience

Senior Software Engineer II, Frontend · LINE MAN Wongnai — 2020 – Present

LINE MAN · Commerce flows inside the LINE MAN app, shared SDK and platform tooling — 2023 – Present

- Led frontend delivery of the LINE MAN VIP subscription: package landing, quote and checkout (QR PromptPay, K PLUS), VIP profile, and manage and cancel flows, later extended to a LINE Premium partnership.
- Built Lock Promotion (Lock Deal) from scratch, then shipped bulk purchase, refunds, sorting, filters and flash-deal countdowns through Unleash A/B experiments and Jitsu analytics.
- Delivered Group Ordering across the webview, SDK and UI library, from the participant flow to split bill and billing options.
- Built payment integrations: TrueMoney on the core SDK and the v2 Select Payment page used by deals, VIP and packages.
- Set up the micro-frontend platform behind the new LINE MAN admin, built an internal design and prototyping platform, and led the move from Yarn to pnpm across 10+ repositories.

Wongnai · Wongnai.com, E-Commerce, design systems and internal tools — 2021 – 2022

- Delivered the Business Menu epic on Wongnai.com and the E-Commerce home revamp, Deal 2.0 order pages, and deal, voucher and privilege flows.
- Built components and design tokens for Design System 2.0 and delivered Wongnai dark mode end to end.
- Built an internal operations automation tool for LINE MAN (bulk coupon, reward, banner and price-engine scripts).

Lead Frontend Developer · Siriraj e-Portfolio (freelance) — Feb 2020 – Jul 2023

- Built the assessment flows (EPA, DOPS and procedural skills), exams and 360-degree evaluations, mentorship appointments, and a research timeline.

RFCs and POCs

- Wrote the RFC for the new LINE MAN admin (micro-frontend shell over the legacy Vue 2 admin) and led its migration, CI and production hosting re-architecture. (RFC, 2023)
- Proposed and built a recruitment service that gives live-coding candidates temporary, budget-capped LLM access. (RFC, 2026)

Also: Braze in the LINE MAN webview (POC, 2026) · Group Ordering split bill (POC, 2025) · styled-components to Linaria (POC, 2025) · Steak Management (RFC, 2024) · Google Ad Manager on campaign pages (POC, 2024) · Web loading measurement (POC, 2024) · Google Fleet Engine trip tracking (POC, 2023) · Core Analytic (Tech design, 2023)

Skills

Frontend	TypeScript, React, HTML, CSS
Familiar with	Vue, Go, Python, Node.js, AST tooling
AI-assisted engineering	Claude Code and Cursor agent skills, AI code review rules (Bugbot), LLM integration (LiteLLM)
Platforms	In-app WebView, LINE LIFF, Micro-frontends, Design systems
Tooling	Vite, Rollup, pnpm monorepos, Playwright, GitLab CI/CD, Unleash A/B testing

Education

B.Eng. Computer Engineering · Kasetsart University — GPAX 3.38
